- As a Front-End Developer Apprentice at Careerpedia, I collaborated with a dynamic and talented team to build several projects, and I played a crucial part in their growth.
- The training gave me a thorough understanding of the front-end development lifecycle, with a particular emphasis on ReactJS, Redux, JavaScript, Responsive Web Design, HTML5, CSS, and SASS.

Projects

Student Dashboard   01/2024

A dynamic platform that offers a 360-degree view of a student's academic profile, progress, and educational history.

- This intuitive dashboard serves as a one-stop destination for both students and educators to track and understand the educational journey.
- Used ReactJS for dynamic User Interface and SASS for styling.

GST Calculator   12/2023

This project is a GST (Goods and Services Tax) calculator specifically designed for restaurants.

- The project has been developed using a combination of HTML for structure, CSS for styling, and JavaScript for dynamic functionality, ensuring a seamless user experience.
- I have developed this website statically where you can calculate the GST of ordered food.

BEEJ   12/2023

This investment website serves as a platform for customers to engage in investment activities.

- Designed using HTML and CSS, the site offers a static yet user-friendly interface, allowing visitors to explore investment opportunities effortlessly.
- The website is designed to be responsive, ensuring a seamless experience across various devices, such as desktops, tablets, and mobile phones.
